SUMMARY

Computer Engineering student specializing in AI and ML, skilled in Python, TensorFlow, and scikit-learn, with hands-on experience in NLP, recommendation systems, and reinforcement learning. Passionate about building innovative, data-driven solutions.

EDUCATION

BHARATI VIDYAPEETH (DU) COLLEGE OF ENGINEERING Bachelor of Technology in Computer Engineering – CGPA: 9.14 /10	Pune, Maharashtra 2022-2026
St. Antony Inter College Percentage: 80% (XII)	Lucknow, Uttar Pradesh 2022
St. Antony Inter College Percentage: 81% (X)	Lucknow, Uttar Pradesh 2020

EXPERIENCE

SDE Intern – Bluestock Fintech - Designed and deployed AI-powered backend modules, reducing data processing latency by ~25% and improving recommendation accuracy by ~40% in financial workflows. Built and optimized REST APIs and microservices to handle real-time market data and user requests with better scalability. - Collaborated in agile sprints with developers and product teams, contributing to production-grade features for fintech applications. Gained hands-on experience with cloud deployment, CI/CD pipelines, and version control (Git) while working on real-world product integrations.	July 2025 – Sep 2025
AI & Cloud Intern – IBM SkillsBuild (Edunet Foundation, AICTE) - Built end-to-end projects on IBM Cloud, including AI-powered chatbots and ML pipelines using Watsonx and AutoAI improving automation efficiency by 75%. Conducted data analytics and cloud experiments. - Conducted data analytics, applying EDA and ML techniques to real-world datasets.	July 2025 – Aug 2025

PROJECTS

AI Medical Assistant & Skin Disease Detection System - Developed an AI-powered medical chatbot with symptom-based and image-based disease prediction using FastAPI, React, and ML models (Naive Bayes, Random Forest, Hugging Face). - Integrated Doctors API for specialist recommendations and deployed real-time analysis with joblib for text and image inputs. - Project Link: Medical Assistant, System Architecture: Architecture Diagram
Trippy – AI-Powered Travel Planning Assistant - Built VacAIgent, a task-planning agent that generates structured, daily itineraries using CrewAI for intelligent, context-aware task division. Integrated into an interactive Streamlit dashboard, enabling users to explore personalized travel plans with ease. - Leveraged FastAPI, Browserless APIs, and Agentic AI to deliver a scalable, adaptive travel planning solution. - Project Link: Trippy Trip Planner, System Architecture: Architecture Diagram
Automated Book Publication Workflow - Designed an AI + human-in-the-loop pipeline to automate publishing of public-domain books, including scraping, rewriting, reviewing, and versioning with metadata storage in ChromaDB. Enhanced quality control using Reinforcement Learning (Q-Learning) with a custom reward function that balances grammar accuracy and lexical diversity in generated text. - Developed an interactive Streamlit interface powered by Python, Gemini, and Playwright for seamless end-to-end book processing and scalable content management. - Project Link: Automated Book Publication Workflow

SKILLS

- Programming Languages:** Python, Java, SQL, JavaScript, React
- Machine Learning & Data Science:** TensorFlow, PyTorch, scikit-learn, pandas, NumPy, LangChain, CrewAI, LangGraph
- Frameworks & Cloud:** Flask, Streamlit, Firebase, REST APIs, IBM Cloud, ChromaDB, FAISS, Qdrant, PostgreSQL
- Development Tools:** Git, GitHub, VS Code, IntelliJ IDEA, Anaconda, Jupyter Notebook
- Deployment Platforms:** Hugging Face Spaces, Render, Streamlit Cloud, Vercel
- Models & LLMs:** LLaMA 2, Mistral, OpenAI, Google Gemini Pro, DeepSeek, Groq

CERTIFICATIONS

Getting Started with Artificial Intelligence (IBM) - Certificate	Jul 2025
Journey to Cloud: Envisioning Your Solution (IBM) - Certificate	Jul 2025
Generative AI with Large Language Models (Coursera) - Certificate	Apr 2025
Software Engineering, IIT Kharagpur (NPTEL) - Certificate	Jul 2023 – Oct 2023
